

“We resign...”

“...due to the Governor’s reckless treatment of the environment in his budget proposal.”

We love New York. But we can’t serve as New York’s official critters unless the state’s Environmental Protection Fund is restored—for the health of our families and yours.

The Environmental Protection Fund encourages healthier communities across the state by investing in our parks and zoos, wastewater and sewage improvements, recycling programs, open space and farmland preservation, and much more.

But even though the Fund protects what we love most about New York, the Governor wants to cut it by more than a third, putting the health of our air, water and land at risk.

Don’t let the Governor get away with it. State legislators can show how much they love New York by restoring our Environmental Protection Fund.

Paid for by the ‘We Love New York’ Campaign.
